

sensors/tgDataObserver.h

```
graph BT; A[dev/btietz/BaseSpineCPGControl.h] --> C[sensors/tgDataObserver.h]; B[sensors/tgDataObserver.cpp] --> C;
```

The diagram illustrates the dependencies of the file `sensors/tgDataObserver.h`. It is represented by a gray rectangular box at the top. Below it, two other boxes are shown: `dev/btietz/BaseSpineCPGControl.h` on the left and `sensors/tgDataObserver.cpp` on the right. Blue arrows point from each of these bottom boxes up to the top box, indicating that the top file depends on both of them. The left box has a red border, while the others have black borders.
